EUROVETS

VETERINARY SUPPLIERS

Eurovets YOUR complete veterinary Supply and Support SOLUTION.

ABOUT EUROVETS

EUROVETS IS YOUR COMPLETE VETERINARY SUPPLY & SUPPORT SOLUTION

Eurovets, established in 2001 has become the Middle East's foremost supplier of some of the world's best known veterinary products to veterinary clinics throughout the UAE.

We represent leading multi-national brands in nutrition, veterinary equipment, medicines and consumables for companion, equine and production animals. In addition to the traditional wholesaling, Eurovets provides warehousing, distribution, marketing and sales resources in order to support the product in the region.

We also offer a host of value-added services such as maintenance and support for all equipment supplied; service-based offerings such as allergy testing; even end-to-end IT solutions for clinics.

Eurovets supports Continued Professional Development, imparting knowledge of the latest developments in the field to veterinary professionals through high-powered seminars.

We pride ourselves on our professional approach and offer vet specialized product advice where required.

In conclusion our mission is to not only deliver excellent products but to be committed to deliver exceptional customer service to all veterinary clinics and pet retailers in the region.

Eurovets YOUR headquarters for veterinary supply and support and a proud distributor of the Biopet Active brand.

Bio PetActive has been providing its products and services in pet industry since 1998. Since its foundation, the company has handled the challenges experienced by pet owners and provided medical and non-medical products, nutritional aids and care products for the lovely pet friends to have a healthy and quality life.

With a researcher approach, they put a special emphasis on the R&D and quality principles of each product they produce.

With the transition to the new plant, they are exporting to more than 10 countries with more than 100 products in their product range together with their other brands, meeting increasing domestic and foreign demands. They aim to provide new products to the market which are researching and developing in their laboratories and rapidly increasing the export of their products abroad to make Bio PetActive a world brand.

With the motivation, they receive from the positive feedback from the customers and their zero-compromise policy on quality, the company aims to be one of the leading companies in the industry in the future as it is today.

OptiBiomega

Salmon Oil

Healthy Skin and Coat Support with Omega-3 and Omega-6 Fatty Acids for Cats and Dogs

OptiBiomega Salmon oil contains 100% salmon oil. Salmon oil is high in **Omega 3** and **Omega 6** fatty acids.

The proven benefits of omega-3 and omega-6 fatty acids:

- Helps maintain healthy skin and a glossy coat.
- Helps to reduce skin dryness and flaking.
- Help provide softness to the skin.
- Help modulate inflammatory responses of the skin.
- Helps prevent skin allergy.
- Helps the mental development of the fetus and puppies.
- It improves the cognitive functions of old dogs.

EFA (Essential Fatty Acids) are involved in controlling a range of problems, such as allergies, arthritis, and heart disease among others.

In addition; regulates the immune system, helps inflammatory bowel disease, lowers blood pressure and triglycerides, helps to produce more collagen.

OptiBiomega Omega⁺

Healthy Skin and Coat Support with
Omega-3 and Omega-6 Fatty Acids for
Cats and Dogs

Omega-3 and **Omega-6** essential fatty acids enriched **with fish oil**, contains vitamins and zinc promotes a healthy skin and shiny coat in cats and dogs.

OptiBiomega is recommended for cats and dogs that are old and suffer from sickness traumas. OptiBiomega helps in the treatment and prevention of certain skin and fur disorders caused by vitamin or fatty acid deficiencies.

Omega-3 Increases the oxygenation of the brain (especially in older animals) and improves the performance of active dogs. It increases the learning capacity of puppies.

Omega-6 The lack of omega-6 leads to dry, brittle and thin appearance of the fur. It also affects the integrity of the skin; Skin becomes more sensitive to dehydration and infections.

Zinc It has vital importance in collagen and keratin synthesis. It has healing properties and helps the animal's fur to look beautiful.

Bio Puppy

Puppy Milk Replacer Food Supplement for Puppies

A food supplement for your puppy precisely formulated to match mother's milk and supports optimal growth and development of your furry friend. Its balanced formula contains proteins, vitamins, minerals, and oils.

Providing all the nutrition needs of prematurely separated puppies, Bio Puppy contains all necessary vitamins and minerals and helps healthy muscle and bone growth. It can also be used as a nutritional supplement for pregnant, nursing, old and weak adult dogs.

Its lactose content is reduced in order to prevent diarrhea. Bio PetActive Bio Puppy provides a healthy and easily digestible nutrition for your dog.

L-Carnitine: It is used for metabolism of fatty acids in the body and conversion of energy within the cells. It helps to reduce the proportion of fat in the body, losing weight, and to turn the fat in between ineffective muscle masses into energy.

VitaliCAT Paste Junior

Vitamin Paste for Kittens

A feed premix containing **Vitamin, Taurine, Dicalcium phosphate and MOS** to support the healthy development of kittens. It provides a well-balanced vitamin combination to your kitten.

Ingredients: Vitamin A, Vitamin D3, Taurine, Vitamin B6, Niacin, Vitamin B1, Ca-D-Pantothenate, Vitamin B2, Folic Acid, Biotin, Vitamin B12, Dicalcium Phosphate, MOS

Contents;

Taurine; Taurine can not be synthesized in the body of cats and must be supplied from outside. Many metabolic disorders such as deterioration of heart function, deterioration of eye health can be observed in taurine deficiency. In addition, growth retardation due to the effect of skeletal system in kittens is one of the symptoms that can be seen due to taurine insufficiency.

Dicalcium phosphate: Calcium and phosphate are involved in bone and tooth structure. There is an optimum ratio of calcium phosphate for cats and dogs. Failure to adequately meet the calcium and phosphate needs, and impairment of this balance can lead to skeletal problems that can not be corrected in life, especially in the offspring that are in rapid growth.

Mannan-oligosaccharide (MOS): It contributes to a balanced population of bacteria in the intestines. They are also effective against harmful bacteria in the intestine. They prevent pathogenic bacteria from developing by preventing binding to the intestinal mucosa. Thus it supports the digestive system.

VitaliDOG Paste Junior

Vitamin Paste for Puppies

A feed premix containing **Vitamin, L-Carnitine, Dicalcium phosphate and MOS** to support the healthy development of puppies. It provides a well-balanced vitamin combination to your puppy.

Ingredients: Vitamin A, Vitamin D3, Ca- D-Pantothenate, Niacin, L-Carnitine, Vitamin B6, Vitamin B1, Vitamin B2, Folic Acid, Biotin, Vitamin B12, Dicalcium Phosphate, MOS.

Contents;

L-Carnitine helps your lovely pooch to develop healthy muscles and helps the body to burn fat effectively. Therefore, carnitine is very beneficial and effective during physical exertion, especially when it is long-term. In some dog breeds (**Boxer, Doberman, Cocker Spaniel, etc.**), serious heart diseases are often associated with inadequate production of carnitine by the body.

Dicalcium Phosphate: Calcium and phosphate are involved in bone and tooth structure. There is an optimum ratio of calcium phosphate for cats and dogs. Failure to adequately meet the calcium and phosphate needs, and impairment of this balance can lead to skeletal problems that can not be corrected in life, especially in the offspring that are in rapid growth.

Mannan-Oligosaccharide (MOS): It contributes to a balanced population of bacteria in the intestines. They are also effective against harmful bacteria in the intestine. They prevent pathogenic bacteria from developing by preventing binding to the intestinal mucosa. Thus it supports the digestive system.

Silycumin

Effective Detox & Immune System Support for Cats and Dogs

Silycumin is a supplementary feed premix that regulates **liver and kidney function** and **supports the immune system** of cats and dogs.

A high rate of **80% Silymarin** which is an active substance of **Milk Thistle** extract is used in Silycumin.

Curcumin is an active ingredient of **Turmeric Extract** that used in Silycumin. Taking into the account the fact that Curcumin has a weaker absorption in the body, a water-soluble Curcumin which produced with high-end technology is used in Silycumin. This increases the bioavailability of the product by increasing its absorption in the body.

Milk Thistle and Turmeric;

- Removes toxins from liver and kidney
- Regulate liver and kidney functions
- Supports liver regeneration
- Supports kidneys damaged by diabetes
- Its' antioxidant properties may be beneficial as anti-cancer support

Your cats and dogs are exposed to many toxins in antibiotic and chemotherapy treatments, after internal and external parasitic drugs and vaccinations and even with industrial foods. It is recommended to use **Silycumin to detoxify these toxins stored in the liver from the body.**

BIO-Urinamin

Urinary Tract Health Support with Cranberry Extract and Vitamin C for Cats and Dogs

Bio-Urinamin promotes a normal, healthy urinary tract functions in cats and dogs. It helps reduce acute or chronic recurrent **urinary tract** sensitivities. Bio-Urinamin chewable tablet contains a blend of key natural ingredients such as cranberry and Vitamin C to support your furry friends healthy urinary tract.

Well-known in North America and Scandinavian countries **cranberry (Vaccinium macrocarpon)** helps prevent urinary tract infections (UTIs).

The common cause of urinary tract infection is bacteria. Bacteria causing urinary tract infection **Escherichia coli (E. coli)** is commonly found in dogs and cats. These bacteria commonly found in the urinary system adhere to the mucous membranes of the urinary system and replicates in an abnormal form and causes infections in the urinary system.

Proanthocyanidin (PAC), the active ingredient of cranberry is a form of antioxidant. It's responsible for preventing bacterial adhesion to the lining of the bladder reducing the potential for urinary tract infections (UTIs). **Proanthocyanidins** have been shown and proven to significantly reduce the adhesion of **E. Coli**.

Bio Urinamin promotes optimum urinary tract health.

- Bio-Urinamin is very rich in proanthocyanin (PAC).
- Formulated with 100% natural active ingredients.
- Contains top quality cranberry fruit powder.
- Does not include colorant.

Felilysine Gel

L-Lysine Gel for Cats

Felilysine Gel is a **L-Lysine** supplement gel specially developed to support the immune system of cats.

The role of L-Lysine in the body;

Studies have shown the benefits of increasing nutritional lysine uptake in the fight against herpes virus, an agent responsible for upper **respiratory diseases**, commonly referred to as **feline rhinitis**, in cats, as well as the basic role it plays in protein synthesis.

In animals with infection, lysine supplement reduces the severity and duration of infections. Reduces the risk of future outbreaks.

- Helps pets produce **antibodies and enzymes** that support the **immune system**.
- Promotes **healthy eye function** and normal **respiratory function**.
- Helps alleviate **FHV-1 (Feline Herpes Virus)** symptoms.

CatiMALT Paste Pat

Hairball Remedy for Cats

Specially formulated paste helps to eliminate and prevent hairballs in cats.

Cats swallow some hairs while licking their bodies with the purpose of cleansing and these hairs eventually become hairball in their stomach or intestines causing blockage in the gastrointestinal tract.

If the hairball moves past the stomach and goes to intestines, it could calcify and block the bowels. **Long-haired cats do face this problem a lot.** The wad in the stomach that can't be retched is a common problem among short-haired cats that groom a lot. The best way to protect is to use Cati Malt Paste, both for prevention of constipation and for the gentle movement of hairball that have not yet been into the stomach and intestines.

Mannan-oligosaccharide (MOS), with the prebiotic effect, increases the beneficial bacteria in the bowel; Causing harmful bacteria to diminish, helping our friend to benefit from the maximum amount of food he has eaten, and playing a role in strengthening immunity.

Bird Products

We evaluate the technology and experience in our R & D lab, where we develop care products for our cat and dog friends, also for cage birds and pigeons.

Bio AviCare

Skin-Feather Care for Cage Birds and Pigeons

Palmarosa oil in Bio-Avicare Aerosol formulation is obtained from **Cymbopogon martinii** plants.

Palmarosa oil which is used in alternative therapies has moisturizing properties. **It makes the skin and feather of cage birds and pigeons healthy and shiny.** In addition, Palmarosa oil is a **natural lice / flea / tick remover.**

Bio-Avicare Aerosol preserves the **natural oil balance of the skin.**

It ensures the protection of the skin's oil balance and **it helps in the treatment of wounds and bruises** caused by cage bird's pecking themselves and plucking their feather.

Bio-Avicare Aerosol **removes skin irritations caused by flea, tick and lice.**

Mantax-Scaly

Skin Care for Cage Birds

It helps in the treatment of skin lesions and skin irritations. **It's used as support for the treatment of dry, scaly, irritated feet, legs and beaks.** It keeps the skin soft and smooth.

From the substances in the Mantax-Scaly formulation;

Rosemary oil; is useful for dry and flaky skin lesions. It has antiseptic properties. It helps in removing dryness on the skin.

Olive oil, is a very rich oil in terms of unsaturated fatty acids. Especially rich in **omega-3. Omega-3** deficiency causes flakey and skin dryness.

Coconut oil, it has skin softening and antiseptic properties.

Vitamin E, is used as an antioxidant. Paraffin liquid is used as the carrier and softener.

Bio AVI Vitaminasol

Amino Acid, Vitamin and Electrolyte for Ornamental Birds and Pigeons

Bio-Avivitaminosol is a **liquid premix that contains balanced amino acids, vitamins and electrolyte** to support the healthy development of tropical birds and pigeons.

It strengthens the general condition and gives energy to birds and help ease feelings of fatigue and illness.

- It detoxifies the liver.
- It strengthens the muscles, prevents cramps and improves flight performance.
- It helps in the formation of new feathers.

After antibiotic treatment and vaccination, it brings the body regimen to its stable level.

Content;

Choline chloride supports faster growth of the juveniles by increasing the activity of amino acids. It also prevents accumulation of fat in the liver. High density amino acids (**L-Methionine, L-Lysine**) and **Biotin** promote the healthier and brighter growth of the feather.

Calsi Bird

Calcium for Pigeons and Cage Birds

Calsi Bird is a high quality, **water-soluble calcium source**. This nutritional supplement is used for quality eggshell formation, for good skeletal development in young birds, during the breeding season and in calcium deficiency.

Calcium is an essential element in a bird's body. Besides its other benefits, it is necessary for proper functioning of the nervous system. Calcium deficiency in birds leads to serious health problems. If the bird is not given enough calcium, it will cause skeletal and bone deformation. It causes bad eggshell formation.

It is highly recommended to give extra calcium for birds during the **breeding season**. **Adequate calcium provides good eggshell formation and healthy skeletal development.**

Spirulina

For
All Birds

BioPetActive Spirulina is a feed premix that balances the healthy development of birds.

Spirulina;

- It is a **completely natural food containing** many vitamins, minerals and proteins.
- It is the best vegetable protein source with **60% protein ratio**. And it meets all the daily need of birds for **beta-carotene, vitamin B12, vitamin B complex, iron, essential minerals and gamma-linolenic acid**.
- It's a complete protein that contains **all the essential amino acids**.
- The cell wall consists of mucopolysaccharides, it doesn't have cellulose in its structure. This structural feature makes **spirulina easily digestible**.
- Provides the formation of **healthy and shiny feathers**.
- Supports the formation of **healthy intestinal flora**.

Flora Control

Intestinal Flora Control for Pigeons and Tropical Birds

Flora Control is an **intestinal control** with probiotic content. This nutritional supplement protects the natural intestinal flora and **prevents the proliferation of pathogenic bacteria.**

The high amount of benign bacteria in the intestine affects the overall health of the pigeons positively. However, the increase in the amount of pathogenic bacteria leads to watering of the feces, which leads to electrolyte and fluid loss.

By using Flora Control, **we can get rid of this kind of problems. Antibiotic use kills both good and bad bacteria.** Therefore, Flora Control protects the general health by **preserving the natural intestinal flora** and preventing the adherence of pathogenic bacteria to the intestinal wall.
