The Experience is the Difference

superior animal health technology for every stage of the journey

COMPANION[®]
ANIMAL HEALTH
LifeCure, LLC

Your Companion

You provide the best care for your patients, and it's not an easy job. From bunnies to Great Danes, patients who can't show you if, or where they're hurting on a daily basis make your job one of the most challenging - and rewarding.

When you are in the trenches of the day-to-day hustle you need a reliable partner. A partner who can help you find the pain before the patient shows you that they hurt. A teammate who can provide innovative pain relief solutions, and

someone who is not afraid to think outside the box when it comes to developing a creative treatment plan.

Companion is your partner. For every stage of care, during every stage of life, Companion has reliable technology to support **your** medicine.

Together, we will achieve more for your patients and your practice.

The Coach, The Stance

Know they are hurting before they show you.

"Charlie" started limping all of a sudden, can you help him?" Charlie has had a partial CCL tear for several months before he began limping, because he has been hiding his pain. Could we have diagnosed Charlie's problem before it got worse? Yes.

The Stance Analyzer is a key component of any wellness exam or treatment program. Quickly measure weight-bearing for a road-map of where to look for injury.

Detect lameness early, measure treatment progress, recommend additional services, and visually show pet owners change.

The fastest solution to Charlie's pain and inflammation after a TPLO surgery - laser therapy. The nimble problem-solver on your team is fast-acting and versatile. A key component of post-surgical, and acute and chronic disease state treatments on any species that hops, slithers, flies, or limps into your clinic.

The Problem-Solver, Therapy Laser

Relieve pain and heal a wide variety of conditions.

- Consistent outcomes
- Easy-to-use
- Fast, trustworthy results
- Drug-free, surgery-free, non-invasive pain relief
- The most versatile tool in your clinic
- Patented delivery technique
- Advanced species-specific protocols

The Supporter Cold Compression

Enhance treatment programs with this team player.

Your post-surgical pain and inflammation management programs include a multi-modal approach. Minimize post-operative swelling and pain with an easy solution - cold and compressive therapy.

Before Charlie wakes up from his surgery you will already have the upper hand on the battle with his swelling.

Pump out edema -
jump-start healing

The Visionary INsight System

Diagnose with confidence.

Intra-articular pathologies can be difficult to differentiate and diagnose. Meet the visionary on your team that will bring big answers in a small, mobile device - the INsight system.

Not sure if Charlie has a full or partial CCL tear? With the INsight system you will obtain real-time visualization into Charlie's condition so you can treat his injury with the most appropriate plan of care. With the INsight system, you can record real-time video and images of intra-articular pathologies, share your findings with Charlie's through smartphone transferability.

The Innovator, Regenerative Therapy

Think outside of the box with regenerative medicine.

- Fast collection, processing & treatment
- Platelet Rich Plasma (PRP) processing
- Canine validated PRP system
- Stem cell processing
- Industry-leading education

Regenerative medicine is the innovator on your team - when a certain treatment option is not optimal for a patient or pet owner, regenerative medicine can provide a resourceful solution.

Perform treatments from start to finish in less than 30 minutes.

If Charlie's partial CCL tear was caught at an early stage, stem cell therapy combined with Platelet Rich Plasma may have been able to regenerate tissue and negate the need for surgery, providing a more conservative treatment approach. This cost-effective solution may have been just the creative solution his owners were looking for.

The Implementer, The Jump Start Program

Gain traction with your staff and clients and realize business success.

Implementing new technology can be intimidating. The Companion Jump Start Program is designed to help you integrate new treatment techniques into the fabric of your day-to-day operations.

Get the team rowing in the same direction with your implementation road map and in-depth on-boarding resources.

The Companion[®] Promise

Evidence. Education. Partnership.

Evidence

Products based in evidence that provide superior clinical outcomes are Companion's commitment. Protocols for all Companion products are based on a large body of clinical research coupled with an understanding of your real-world needs as a veterinarian.

Education

When you invest in new technology, the learning process can seem daunting. How will I get outcomes? Will it work in my practice? Companion is founded on the cornerstone of education and provides appropriate learning opportunities for each step of your learning journey.

Partnership

Through every stage of your purchase process and transition into the Companion family, our team is here to make sure the technology you are investing in is a fit for your clinic. Our team of sales, clinical, business, and customer support resources provides support for you - no matter what your needs are.

The Experience is the Difference

Laser Therapy

The Problem Solver on Your Team

Meet the most versatile member of your team. From acute to chronic, wounds to arthritis, and dogs to bunnies - laser therapy is the problem solver on your team. Fast, drug-free, surgery-free, non-invasive pain relief for your patients.

Dosing

Companion[®] therapy lasers are designed to provide you with the right dose of laser energy for every condition, every patient, every time. Protocols are built on years of clinical research to provide you with confidence and consistency.

- **SmartCoat[®] Plus Technology**
Build custom protocols based on individual patients
- **Perfect Protocol[™]**
Create your own custom protocols
- **Advanced Species-Specific Protocols**
Canine, feline, equine & exotics

Delivery

Deliver effective treatments for every condition with 4 application-specific treatment attachments, including the patented Deep Tissue Applicator.

Benefits of the Deep Tissue Applicator:

Compression gets you closer to target tissue.

Collimation reduces energy loss.

Refractive Index minimizes light lost in transmission.

Reflection light loss is significantly reduced.

Soft Tissue Work is achieved during treatment.

Dependability

The combination of optimal dosing and delivery solutions provides you with consistent, replicable outcomes.

- **Patient Tracker**
Easily save and repeat treatments
- **Flexible Architecture**
Upgrade and update-able
- **Veterinary-Specific**
Built for durability with your needs in mind

Companion Therapy Lasers

CTX

The most advanced therapy laser

- Patient Tracker
- Intuitive Interface
- Perfect Protocol™
- SmartCoat® Technology
- Built-in videos
- Battery operation

Built-In Protocols:

- Canine
- Feline
- Equine
- Exotics

Reptile, Small Mammal, Avian

Power: 0.5 - 15 watts

Modes: CW or Pulsed

Wavelengths: 980/810 nm

Weight: 8 lbs

Laser Type: Class IV

CTC

The market leader in laser therapy

- SmartCoat® Technology
- Built-in protocols
- Intuitive interface
- Battery operation

Built-In Protocols:

- Canine
- Feline
- Equine

Power: 0.5 - 15 watts

Modes: CW or Pulsed

Wavelengths: 980/810 nm

Weight: 8 lbs

Laser Type: Class IV

Empower DS

The most versatile delivery system

- 4 application-specific treatment head attachments & cap
- Includes the patented Deep Tissue Applicator
- Integrated finger switch operation
- Durable fiber optic cable
