Gut Balancer is an everyday palatable probiotic and prebiotic powder, specifically designed for horses and ponies. Use daily for general wellbeing, to normalise digestive function and efficiency, and for equines prone to digestive upsets.

Suitable for any horse, of any age and is compatible with any diet.

Gut Balancer can optimise health and immunity derived from the recognised probiotic effect.

Many riders notice horses are more settled once they add Gut Balancer to their regular diet.

Testimonial

REBECCA CURTIS, NATIONAL HUNT TRAINER:

"Here is just a few words I would like to say regarding my experience with Protexin.

We have been using Gut Balancer for the past two seasons and I cannot recommend it enough!!

As soon as the horses get this product into their system I can see a dramatic difference in their coat. They immediately start to shine and put on weight. It is hard as a NH trainer to keep horses eating and looking well.

I find Protexin helps dramatically to maintain a healthy system. I have had no problems with my horses having gastric ulcers, which I know a high percentage of yards do. I think Protexin definitely helps them digest their food properly. I have also found it helps boost their immunity. We have had very little problems with viruses and sickness in general since the horses were on this product.

As we are based in West Wales, we have to do a lot of travelling to races with our horses. I feel Protexin helps the horses cope with the long journeys as they always arrive calm and stress free. I cannot recall ever having colic in the yard with any of our horses and again I think that this must be down to the use of Protexin."

Acid Ease

IDEAL
FOR
RACING

SUITABLE
FOR
COMPETING

SUITABLE
FOR
BREEDING

SUITABLE
FOR
LEISURE

Many horses will experience discomfort associated with the formation of gastric ulcers. Acid Ease helps buffer excess acid and provides a regular probiotic to complement their management.

Acid Ease is a unique, concentrated, palatable combination of antacids, fibre, kaolin, amino acids and Protexin probiotics and prebiotics. Presented as a palatable powder, Acid Ease is suitable to calm excess acid in all horses and weaned foals.

Acid Ease contains the antacids calcium carbonate and magnesium carbonate, as well as kaolin, pectin and L-threonine which together act to buffer excess acid and help protect and soothe the gut lining. The high quality fibres – pectin and psyllium help make this a superior product.

Acid Ease can be used in all horses and ponies prone to gastric ulceration and also as a follow up to conventional therapies.

Eurovets Code	Unit size
E003514	1.5kg
E003515	3kg

Key Ingredients

GASTRIC ANTACIDS – to calm excess acid

FIBRE – alfalfa, psyllium and pectin - high quality fibre sources

L-THREONINE – aids in mucus production of cells lining the gut which helps provide protection from damage

PROTEXIN PROBIOTICS – to balance the gut microflora

PREPLEX® PREBIOTICS – to nourish the beneficial bacteria

Testimonial

ALEX HARDWICK, INTERNATIONAL DRESSAGE RIDER

"Protexin Acid Ease is amazing! My small little horse, Royal Chester, is a worrier and tends to drop weight when travelling. I was therefore concerned about taking him to his first international show in Biarritz, two day drive. I gave him Acid Ease before and during the competition and it made an incredible difference. He looked really buff and went fantastically. We now use Acid Ease for all types of horses with great results!"

PUREST SALT FROM CHESHIRE

ENCOURAGES SALIVATION

TASTY APPLE FLAVOUR

Testimonial

PHIL ROWLEY:

"Here at Rowley Racing we have used Gut Balancer now consistently for the last three seasons with great results.

Recently we were asked to trial an enhanced mineral lick from Protexin. The horses love it, each one lasts a horse about a month. In the yard we trialled it in the horses were seen to be less stressed post exercise and exhibited much reduced stress behaviours such as wood chewing, plus they drank more."

Gut Lix is a new health lick containing essential salt and minerals that are vital to a horse or pony's diet. It also contains Preplex® prebiotics to support their gut health and nourish the beneficial bacteria in the gut.

Contains no sugar or molasses so offers a healthier treat and helps avoid any unnecessary weight issues.

Gut Lix contains optimum levels of minerals and trace elements and can be used all year round, especially during the summer months to replace lost essential minerals.

PREPLEX® PREBIOTICS – to nourish the beneficial bacteria

Testimonial

**BERNICE CUTHBERT,
TRAINER OF LOUGHNATOUSA
WB. ASTON PARK STUD:**

"Protexin has been the trusted probiotic brand we have used here at Aston Park for over 15 years and has formed an integral part of horse management from foals through to racehorses. Loughnatousa WB performs brilliantly and remains more focused and relaxed whilst on Recover Aid, remaining bright and sparky through to the last day of a major show."

Recover Aid contains an effective combination of B vitamins, antioxidants, probiotics and prebiotics along with milk thistle and dandelion flavour to promote appetite.

Recover Aid can be used to support liver function and for use in horses and ponies following recovery from surgery or infection. Also ideal following periods of intense exertion or heavy work.

Suitable for use in all horses as a 'pick me up' or can be used to boost energy prior to that special weekend outing.
