Eurovets YOUR complete veterinary Supply and Support SOLUTION.

ABOUT EUROVETS

Established some two decades ago, Eurovets has become one of the Middle East's foremost supplier of some of the world's best-known animal health and welfare products to veterinary clinics, hospitals, retailers, stables and production facilities. We employ some 30 dedicated and specialized staff including several veterinarians in the UAE and additional staff in selected GCC countries complemented by extensive warehousing and logistics facilities.

Eurovets represents a wide range of leading multinational brands in diagnostics, medicines, nutrition, veterinary equipment and consumables in the wider GCC region. In addition, Eurovets offers a host of value-added services such as maintenance and support for equipment supplied, end-to-end IT solutions for clinics and general solutions to wider animal welfare and management challenges.

Eurovets is dedicated to Continued Professional Development through specialized seminars and education events. We share the latest developments and knowledge in veterinary medicine and sciences from external specialists and educators. We are committed to a professional approach with quality products, specialized product advice and outstanding customer service. In combination, this has led to an enviable reputation and formidable market position as a complete veterinary and animal welfare supply and support solution.

ABOUT ROYAL HORSE

With over 40 years of experience, ROYAL HORSE is a leader in the equine nutrition market across the globe.

ROYAL HORSE benefits from the best innovations developed by our R&D experts around the world.

ROYAL HORSE makes balanced feeds, developed by veterinarians and equine nutritionists. The aim is to guarantee top performance from horses, whether ridden for pleasure, sport, competition or racing, or used for breeding. Their raw materials are selected for their nutritive value and consistency. They meet strict specifications and provide the same high quality in every country where ROYAL HORSE is sold.

All ROYAL HORSE feeds and the raw materials that go into them are analyzed to ensure that they are nutritional and healthy. Their products are manufactured in plants that have OQUALIM certification, attesting to the use of best practices in composite feeds production, and that comply with the CNEF Quality Charter.

Eurovets is the proud distributor of Royal Horse products.

20KG BAGS FOR CAMELS

VALUE FOR MONEY

- ✓ Quality charter : OQUALIM, CNEF, ISO 9001
- ✓ Contaminant analysis after each manufacturing + FEI and race codes recommendations
- ✓ Each raw materials are especially selected for equine specie
- ✓ Supplemented with MOS = carbohydrates extracted from yeast cell walls Selected. These are prebiotics. They act as a regulator of the intestinal flora and ensure the safety of transit, helping to avoid digestive disorders.
- ✓ Formulated high levels of hemicellulose = We formulate on the hemicellulose (new). It is the most digestible fraction of the total cellulose. Plus fibers are digestible, plus they have a higher energy interest and they are safe for the digestive transit.
- ✓ Moderate starch contents (<29%) = Horses cannot digest large amount of starch because it doesn't have amylase enzyme in the small intestine. The starch excess is prejudicial to the health and performances.
- ✓ Criteria CAB controlled = Balance acid / base is fundamental. When an ionic imbalance, heartbeat will increase which will lead to a poorer recovery after effort
- ✓ Supplemented with L-carnitine = It's an amino acid which is involved in the oxidative metabolism of fatty acids. It improves muscle strength and reduce recovery time
- ✓ Optimal report omega 3 / omega 6 = Omegas have proved their effectiveness as an antioxidant, resulting in a decrease in blood viscosity, lower heart rate and improved oxygenation of the muscles
- ✓ Enriched with essential amino acids = Lysine, Methionine, Cysteine, Threonine cannot be synthesized in the body and must be found in food. They are essential for horses efforts
- ✓ Addition of organic selenium = They are best stored in the muscles as nonorganic selenium. This allows for better bioavailability and better bioactivity in sport horses
- ✓ Use of chelated trace elements = Chelates are binding molecules of amino acids and trace elements. They are protecting trace elements, to facilitate absorption, transport and storage in the body
- ✓ Use of antioxidant additives = AO ELITE reduce oxidation effects, boosts muscular effort and facilitates recovery.

Restoring the balance

Competition - Reveal excellence

H-350

Eurovets Code: E008805

Because your horse deserves to win, ROYAL HORSE develops advanced nutritional solutions. Our Competition line meets the high energy needs of horses during competitions by supporting intense muscular exertion and promoting recovery.

H-350 supplies the energy ideal for prolonged effort (1 to 2 hours per day)

Available in 25 kg bag

FLAKED FEED

Flaked feed, in addition to forage, formulated for prolonged effort, developed for competition horses and ponies (endurance, eventing, driving, racing).

Supplemented with Prebiotics:

MOS (Mannan-oligosaccharides) which bio-regulate gut flora promoting intestinal transit.

Supplemented with Omega 3, respecting an optimum Omega 6 / Omega 3 ratio fostering the use of alternative energy derived from the high vegetable fat content.

Supplemented with L-Carnitine, an essential nutriment for effort that promotes the use of energy derived from fats.

Contains AO élite, a plant antioxidant complex that reduces the effects of oxidation caused by stressful situations. In synergy with other antioxidants, it supports muscular exertion and facilitates recovery.

Presence of GWB, an active ingredient based on plant extracts supporting gastric comfort.

INSTRUCTIONS FOR USE

Ration in two or three meals per day with fresh water freely available.

STANDARD RATION FOR A BROOD MARE WEIGHING 500 KG

Gestating (before 8 months):

B-150: 2 to 3 kg (4.5 to 6.7 litres) and hay: 5 kg

Gestating (8 to 11 months):

B-150: 4 to 5 kg (8.9 to 11 litres) and hay: 5 kg

Lactating (first 3 months after foaling):

B-150: 6 to 8 kg (13 to 17.7 litres) and hay: 5 to 7 kg

STANDARD RATION FOR A SELLE FRANÇAIS FOAL

Pre-weaning:

First month: 0.5 kg (1.1 litres) of B-150 then add 0.5 kg per month, (e.g. at 6 months: 3 kg (6.5 litres))

Post-weaning:

6 to 7 months, B-150: 3 to 4 kg (6.5 to 9 litres) and hay: 3 kg

8 to 12 months, B-150: 3.5 to 4.5 kg (7.7 to 10 litres) and hay: 4 kg

STANDARD RATION FOR A STALLION WEIGHING 500 KG

Covering season:

B-150: 4 to 5 kg (9 to 11 litres) and hay: 5 kg

Outside covering season:

B-150: 2 to 3 kg (4.5 to 6.5 litres) and hay: 5 kg

FOR PONIES WEIGHING 250 KG, HALVE THE QUANTITIES INDICATED

PUT OUT TO PASTURE

Halve the quantities of feed and hay or stop depending on the quality and quantity of the pasture available.

WHY EUROVETS?

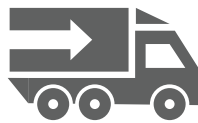

IMPORTER

Source and import the highest quality products to meet the needs of veterinary, equine and camel markets across the GCC region.

SEMINARS AND CPD EVENTS

Continuing professional development (CPD) seminars and events deliver relevant, practical knowledge for veterinarians and healthcare professionals.

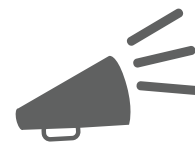

LOGISTICS, FLEET AND DISTRIBUTION

Temperature-controlled vehicle fleet and state-of-the-art inventory management system.

FACILITIES

Fully certified,
Temperature-controlled warehouses.

BRAND MANAGEMENT & MARKETING

Digital & traditional marketing support for the brands and products we represent.

AFTERMARKET SOFTWARE AND SUPPORT

In-house technical field support team provides onsite installation, staff training, equipment maintenance and software updates.

Eurovets YOUR complete veterinary Supply and Support SOLUTION.
